

How students can get involved

We ran a number of focus groups and a survey with students whilst we were developing our plan so they could share their experiences. Our findings from these activities played a key role in identifying the areas we need to improve and the actions we need to take. We shared these findings with members of the Student Union and they had the opportunity to comment on our findings. Students also had the opportunity to comment on a draft of the plan when it was shared with different internal committees. We have a student representative on the committee which oversees our access and participation work and we will continue to work with the Union to monitor the impact of this plan.
