

The main focus of the workshop is on the application of the theory of dynamical systems to the study of the stability of periodic orbits. The workshop will be held at Brunel University, Uxbridge, UK, from 12 to 13 December 2014. The workshop is organized by Prof. Dr. G. A. Iooss, Brunel University, and Prof. Dr. D. J. W. SIMPSON, Brunel University. The workshop is supported by the EPSRC grant EP/I055188/1. The workshop is also supported by the Brunel University Research Council. The workshop is also supported by the Brunel University Research Council. The workshop is also supported by the Brunel University Research Council.

THEORY & METHODS: • M, P
APPLICATIONS: • Q, H, P, N

Date: 12-13 December 2014.
 Address: Brunel University, Uxbridge, UK.
